EXCLUSIVE DISTRIBUTOR IN THE NORDIC-BALTIC REGION

Cebriá quality attachments for industrial trucks and wheel loaders are used, for example, in the paper and pulp industry, appliance warehouses, recycling centers, breweries and foundries.

TELESCOPIC FORK POSITIONER

These fork positioners are ideal for those loads that require a wider opening than that of the fork positioner frame. There are three models in the range. The two smaller ones range from 1.4 t up to 5.8 t/600, with integrated or external sideshift. The third model is for extra-wide opening and in the capacity range from 4.0 t up to 12 t/600. We can also offer bespoke solutions.

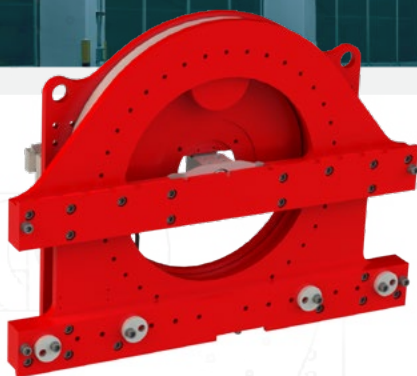

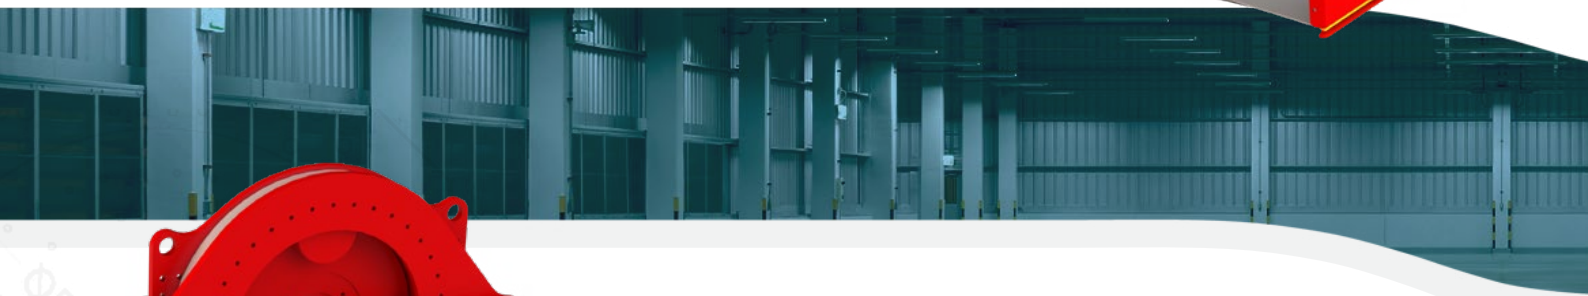

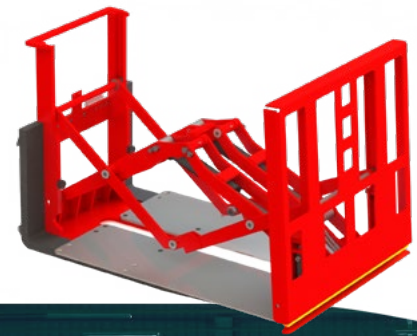

MULTIPLE FORK POSITIONER

The double and triple fork positioners with external sideshift, allow handling of bulky loads, as well as two or three pallets simultaneously. Equipped with an additional hydraulic cylinder, it allows a lateral displacement of the load, at the same time as the positioning of the forks. The standard range has positioners with capacities ranging from 2.0 to 4.0 t / LC 600mm. There are several options that can be added to the positioners to optimize for specific applications.

PUSH-/PULL ATTACHMENTS

A very useful attachment, with capacities from 1.4 to 3.0 t, that allows you to handle warehouse unit loads on slip-sheets instead of pallets. For industries such as food & beverage, paper, building material, chemical, glassware, agricultural and automotive. Several models are available for different handling processes and basis in the specific warehouse set-up.

Rotator 360°

ROTATORS

The rotators are attachments that allow the forklift truck to handle, and dump loads safely and efficiently. They are usually used for goods in boxes, containers, and various loads on tables, etc.

The robust rotators are used in many different industries such as foundries, chemical industries, fishing industries, farming, fruit-growers, etc. Capacities range from 1.2 t all the way up to 10.0 t, with some variation depending on the model.

PAPER ROLL CLAMPS

Equipped with powerful hydraulic cylinders and a contact surface that ensures a secure grip without damaging the load, these clamps deliver high performance and operational reliability.

Their robust design and dependable operation make them an excellent choice for businesses with demanding applications and high material handling volumes.

Available as standard with capacities ranging from 350 kg to 5.5 t, the clamps can be used not only for rolls but also for handling concrete pipes and other loads with similar geometries.

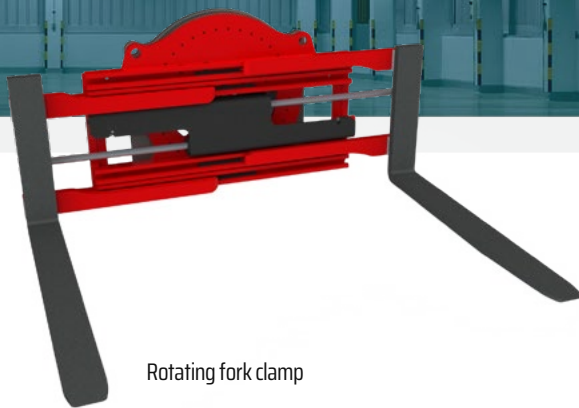

360° rotating coil clamp with attached long arm and fixed or mobile short arm.

360° rotating tissue paper roll clamp.

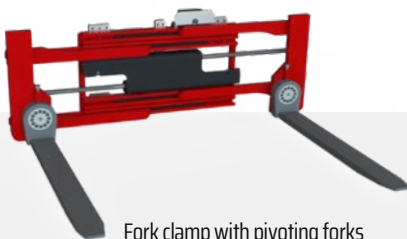

Narrow 360° rotating paper clamp. Handle narrow rolls effectively and safely.

Rotating fork clamp

CLAMPS

With capacities from 1.25 - 6.0 t and a wide selection of standard clamps, we solve most needs and applications. Bespoke solutions can be designed to optimize for customer specific applications.

Hagaberg

RELIABILITY + INNOVATION

Hagaberg provides solutions that help companies work more safely and efficiently with material handling. We are driven by the design and manufacture of fork positioners and system solutions tailored to both the forklift and the user's specific application. Our shared focus is always to deliver the market's best products and customer service.
