

MANUAL EXTENSION - ALWAYS AT HAND

FEATURES

- High level of safety
- Robust design
- Always at hand
- Time efficient
- Integrated or Hook-on

ManuTel® G2 - Standard

ManuTel® - SlimLine

ManuTel® is a problem solver for companies that often handle goods of varying lengths. The solution is to have manual reachforks always at hand and time efficient to handle. They are available as integrated forks along with fork positioners as well as Hook-on (ISO forks).

ManuTel® is perfect for loading / unloading trucks from the side or transporting two or three pallets simultaneously. The blade length can be adjusted quickly with the help of a pin lock, which increases your workplace's safety – Never any unnecessarily long fork blades without loaded goods or too short fork blades with goods loaded. The product range consists of two models with different characteristics described below.

ManuTel® G2 - Standard model - Ideal for loading / unloading trucks from one side. The underside of the extension is equipped with durable manganese steel. This makes the product able to withstand dirt, suitable for outdoor use and has a long service life. A wide product range with up to 5 tons / LC 600 mm as standard, other capacities are available upon request.

ManuTel® - SlimLine model - Ideal for goods and pallets with narrow openings. Extra thin fork blades - only 40 mm. Capacity up to 2 tons.

OPTIONES

The fork can be equipped with extra locking points and upon request customized models with other capacities and cross sections are manufactured.

APPLICATIONS

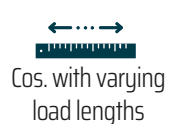

Loading/unloading

DIY Superstores

Transport furniture,
panels, wood, paper

Cos. with varying
load lengths
