

OQT

AUTOMATIC QUICK COUPLER SYSTEM
FOR FORKLIFT TRUCKS

QUICK COUPLERS

OQT is an advanced quick coupler system for forklifts, available in various models for machines ranging from 1 to 9 tons.

OQT enables operators to make automatic changes between different hydraulic and mechanical attachments without leaving the driver's cab. Easily switch between fork positioners, paper roll clamps, rotators, and more in just seconds. With OQT you will therefore always have the right attachment for the job ready and eliminate the risk of personal injuries related to manual attachment changes.

OQT 300i

OQT 850i-55 / -90

SAFER WORKPLACE

OQT quick coupler system is safe and secure with features including a hose break valve, a system for constantly readjusting the locking plungers hydraulically, a lock switch with double function, a warning light and alarm.

OPERATOR FRIENDLY

As attachments are changed and coupled automatically, the operator does not have to get down from the cab. No more handling of couplings covered in oil or leaving the cab with unnecessary exposure to risks.

MORE COST EFFECTIVE

Fast attachment changes and efficient use of the forklift truck help to increase productivity. Experience has shown that investing in an OQT pays off when you must change hydraulic work tools 1-2 times in a working day. OQT reduces the number of forklifts you need, which cuts costs considerably.

Model	Capacity kg / mm	Weight kg	Mounting class ISO 2328	Max. number of quick couplings 1/2" (70 l/min)	Electrical coupling option
OQT 300i	3000 / 500	100 - 110	2A - 3A	6	Yes
OQT 850i-55	5500 / 600	110 - 130	3A - 4A	6	Yes
OQT 850i-90	9000 / 600	130 - 150	4A*	6	Yes

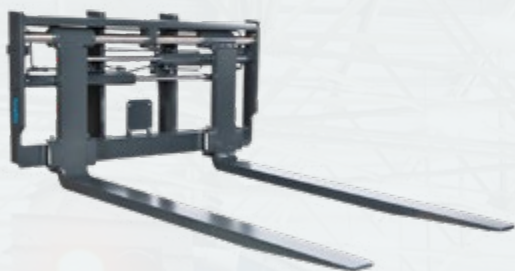

*With possibility for 4B, 5A & 5B

POSITIONERS

C-SERIES C-PROFILE MODEL

A powerful all-round attachment with a clamping function and low maintenance requirements. Its own weight is significantly lower than comparable designs.

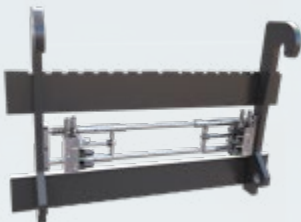

E-SERIES PIN-TYPE MODEL

With encapsulated, high-quality bearings, it is especially suitable for dirty environments and allows sideshifting with full load.

F-/R-SERIES ROLLER BEARING MODEL

Built for heavy loads and demanding environments. The forks are roller-mounted, with 6-10 rollers per fork. The attachment side shifts smoothly and precisely, even under full capacity.

ADAPTER

For ISO forks, positioners, coil booms and other attachments with ISO-brackets. Compatible with both hydraulic and mechanical positioners.

INTEGRATION KIT

Hooks for welding to attachment. Incl. 4 psc of 1/2" hydraulic couplings for two hydraulic functions. As an alternative, the integration can also be bolted on.

CHANGE BETWEEN ATTACHMENTS DIRECTLY FROM INSIDE THE CAB

Hagaberg positioners are characterized by robust construction with high performance, long service life, and excellent reliability.

All positioners can be delivered with QQT integration. The range also features integration kits fitting other brands.

We help you to a complete system solution where coupler system and attachments are fully compatible!

CLAMPS – ROTATORS – BUCKETS

CEBRIÁ

PAPER ROLL CLAMP

Long arm and fixed or mobile short arm.

TISSUE PAPER ROLL CLAMP

For fragile and thin paper.

THIN PAPER ROLL CLAMP

Designed to handle narrow paper rolls.

BALE CLAMP

Safely and efficiently handles all types of bales. Integrated side shift in the arms enables high productivity in palletizing and stacking.

Option: Rotating

360° ROTATING BALE CLAMP WITH FORKS

Robust and solid, designed to rotate heavy recyclable materials in boxes or containers, such as batteries. Engineered for optimal operational safety.

FORK- / BALE CLAMP

Pivoting forks enable smooth handling of pallets and clamp applications. Forks at 0° – Standard pallet handling. Forks at 45° – Horizontal drums, reels, etc. Forks at 90° – Clamping position.

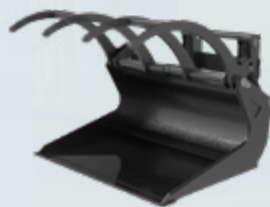

Option: Rotating.

FORK CLAMP

Designed for handling pallets, plastic, and cartons. Can be equipped with scissor or serrated forks, ideal for efficient carton handling.

Option: Rotating.

HYDRAULIC BUCKET WITH CLAW

Commonly used in the recycling industry for handling loose paper and plastic materials.

360° ROTATOR

Enables rotation of the attachment to efficiently empty loads from various types of boxes and containers.

ADAPTIONS

Hagaberg E-Series with QQT integration and KOOI® Reachforks

Fork positioners with the QQT integration can also be equipped with all our fork adaptations and additional features. These may include **KOOI® ReachForks**, **SmartForks**, **Lift-Drop forks**, and forks designed for specific applications. The QQT quick coupler can be configured with either a third hydraulic function for direct connection or an electrical connection for a solenoid valve.

STANDS

Keep equipment organized and save floor space with a vertical stand. Change attachments without repositioning the forklift.

Hagaberg

RELIABILITY + INNOVATION

Hagaberg provides solutions that help companies work more safely and efficiently with material handling. We are driven by the design and manufacture of fork positioners and system solutions tailored to both the forklift and the user's specific application. Our shared focus is always to deliver the market's best products and customer service.
